								+ 7,490-7-9	

14. The difference of Rs. 7,490-7-9 of increase in the gross receipts during the year under report accrued under the items of Gur, other articles of Food, Fuel, Lighting and Washing, Building materials, Drugs, Spices and Gums, Tobacco, Cloth, Metal and Bonded Warehouse, and the decrease under the heads of Sugar, Ghee and other articles not included in above.

The appreciable increase under this head is due to there being a "Mammat" of this commodity in the year under report which necessitated the Traders to import this article in large quantities.

Owing to dearness of grain a large quantity of rice was imported which accounts for the increase.

The increase is due chiefly to the erection of the Edward Mills which consumed a large quantity of stone, bamboos and wood for building purposes.

The increase is due in a great extent to the heavy imports of Zira which was produced in the district and the surrounding villages.

These two commodities were imported in large quantities for the agricultural classes and others who were able to purchase them more freely than in the last year.

The increase under this head is largely due to the realization of tax from the Edward Mills on iron materials used in the construction of the Mills.

The decrease under these heads is due to there being a fewer number of feasts in the year under report.

The decrease is due to there being a partial failure of Kapas (raw cotton) in the district and in the surrounding villages.

15. The net receipts from Octroi and incidence per head of population during the past ten years are compared in the statement below.

Total Rupees ...	4,315	4	10	4,953	10	0	5,344	2	10	6,261	0	1	6,643	14	6

The increased expenditure on office establishment is due to the sanctioned increments to the Municipal staff and to the temporary employment of an Assistant Clerk, the other differences are due to purchase of furniture for the Honorary Magistrate's Court and a safe for the Head office.

Octroi collection.	37.	Actuals for 1906-1907	... Rs	256/-.
		Budget estimate for 1907-1908	2,725/-.
		Actuals for 1907-1908	2,669/-.

The increase is due to the opening of a gate at the Ajmer gate for the passage of carts containing refundable goods and the making of some additions and alterations in the Bonded Warehouse.

Refunds.	38.	Actuals for 1906-1907	... Rs	21,972/-.
		Budget estimate for 1907-1908	31,000/-.
		Actuals for 1907-1908	28,964/-.

The sum of Rs 28,964/- was paid in refunds in the year under review, against the gross income of Rs 74,272/- giving a percentage of 38.99 on the gross Octroi collection against 39.55 in the previous year.

Pension and gratuities.	39.	Actuals for 1906-1907	... Rs	24/-.
		Budget estimate for 1907-1908	340/-.
		Actuals for 1907-1908	323/-.

The Committee *vide* Resolution No. XII dated 6th April 1907 resolved to pay annually a contribution towards the pension of Pandit Ganeshi Lal. A sum of Rs 161-7-4 was remitted to the Treasury Officer Ajmer for payment to Pandit Ganeshi Lal on this account from 1st December 1907 but the amount was returned by the Treasury Officer Ajmer and it was credited to Municipal funds consequently a fresh provision had to be made in the Revised Budget hence the increase.

Lighting.	40.	Actuals for 1906-1907	... Rs	1,184/-.
		Budget estimate for 1907-1908	5,266/-.
		Actuals for 1907-1908	2,773/-.

The increase is due to the purchase of two Kitson Lamps and accessories ; also in some extent to the increase in the number of nights of lighting of the town.

Police.	41.	Actuals for 1906-1907	... Rs	5,680/-.
		Budget estimate for 1907-1908	6,267/-.
		Actuals for 1907-1908	6,245/-.

The increase is due to the enhanced pay and allowance of the Beawar Municipal Police sanctioned by the Government.

The increase was due to (1) construction of iron latrines for the Raigor and Bichurli Mohallas, and the completion of the Diggi latrine, (2) making of 10 night-soil and water carts for the Conservancy department, (3) Purchase of land for burying night-soil *vide* Resolution II dated 19th September 1907, (4) for maintaining the Plague camp and purchase of articles for the same.

The staff consists of the following :—

- 1 Daroga.
- 2 Jamadars.
- 55 Male sweepers.
- 6 Female sweepers.
- 3 Bhishtees.

The carts are worked in contract with animals owned by the sweepers who received Rs. 5-0-0 per mensem for their feed and keep.

44. Report on the Sanitation of Beawar for the year 1907.

Scavenging. *Street.*—The streets and lanes are swept twice a day and the sweepings are collected at certain Depôts, from where they are carted away, outside the city.

Public Latrines.—Out of the eight Public Latrines in the town, five have been made of galvanized iron, and three are of masonry, which will be gradually replaced by the galvanized iron ones, which are more cleanly.

Private Latrines.—Most of the private latrines are not kept in a Sanitary condition. A large number of them are built in a wrong way, and are gradually being remodelled on modern Sanitary lines.

Public Urinals.—There are 32 Public Urinals in use which are of masonry. A few have, this year been made of galvanized iron, and are in use.

II. Removal and disposal of the Night-soil and Foul water.

The Night-soil from private Latrines is carried by the *Birt* sweepers and deposited in the Conservancy carts at the Public Latrines.

This along with refuse of the Public Latrines is taken outside the town and deposited in Trenches about 3 miles to the east of the town.

The foul water from the Public and Private Latrines is removed in the Conservancy carts and thrown away on waste land outside.

III. Drainage.

The surface drainage is sufficient but unfortunately in many cases the drains are covered and inaccessible. The drainage water is carried through the street drains and Nallahs which pass through the city wall and finally empty themselves into Ballad Nallah.

The House Drainage is gradually improving. No masonry "Parnalas" or cesspools are allowed.

The water is conducted through cast iron pipes and received into iron barrels placed on the chabutras outside the houses where they are open to supervision.

IV. Water supply.

The Water supply of the town is got from Municipal and private wells.

Most of these wells on the eastern side of the City receive their supply by percolation from the Bichurli tank and the surrounding country.

The tank does not possess a constant and sufficient supply of water, partly perhaps owing to the imperfect feeder Nallahs within its catchment area, partly on account of the permeable and porous subsoil of the tank.

On the western side of the City there are only a few wells.

There is no certainty of the private wells being always accessible as many of them are within the compounds and it is difficult to supervise their cleanliness.

All these circumstances have led the Committee to take into consideration the subject of providing a constant supply of good and wholesome water, and it is hoped that before long, water works will be started in Beawar.

General.

(1) In the year under report the Committee have carried out extensive investigations at Jalia and along its channel under the advice of Mr. Silk, Sanitary Engineer to the Government of India, who personally visited Beawar last January and instructed Mr. Heinemann Municipal Engineer Ajmer in the details of the tests to be carried out, these tests consisted of a series of borings down the Jalia channel for a distance of about 2 miles and across it, with a few borings in the bed of the Tank, the sinking of a pucca well just below the Dam of the Jalia Tank and testing it with a steam pump. The result of these investigations have not proved satisfactory. The reason of this would seem to be that all the tests of this year have been with the surface water. In 1907 the water at a greater depth was tested and the results were decidedly satisfactory.

(2) This year again the Committee have passed an uneventful one as regards litigation. Bakhtawar Mal's appeal case which was pending in the Court of the Commissioner as reported last year has been decided in favour of the Committee.

(3) The Special Nazul Sub-Committee appointed for the investigation of Nazul properties held in trust by the Committee and of private properties, having finished this laborious task in the latter part of the year a brief description of the former is appended.

(4) It is a matter of great satisfaction for me to report that this scheme has progressed so far in the hands of Sir, Swinton Jacob of Jeypore, that approved drawings of a suitable, elegant, and at the same time not a very expensive edifice are now being prepared with the estimate, and it is hoped that this much delayed scheme will be very shortly submitted with definite proposals to the Hon'ble the Chief Commissioner for his final orders and sanction.

(5) In conclusion I am pleased to be able to state that the Sub-Committees have shown more zeal in their work. Mr. Robinson the Municipal Secretary and Engineer has been of the greatest help to me, he is most energetic and conscientious and the flourishing condition of the Municipality is largely due to his good work.

(a)—It must be clearly understood that under these heads only such general charges are to be shown as cannot be properly shown under any of the other heads. Wherever establishment is employed, or works are constructed, for a particular purpose only, the charge should be shown under the head to which that purpose belongs, and not under these heads.

(b) - If the Public Works Establishment be employed partly upon works connected with any of the other heads, the share of the charges debitable to those heads should be shown under those heads and not under this head.

(c)—Cost of buildings erected or stores used for special work, *e.g.*, for water works, should be charged to those works; cost of such buildings or stores only will be shown here as properly cannot be shown under any of the other heads.

(d)—Contributions should be classified according to the object for which they are made, e.g., for schools under D.—Public Instruction &c.; Contribution not made for any particular purpose, or for a purpose for which no separate head is provided, should be charged under this head.
